VAULT
CONSTRUCTION INTELLIGENCE

Data unity you can build on

Optimise project outcomes with Vault.
A proven construction intelligence platform.

Unite Data Spatially

Create Progress Visibility

Access Insights Proactively

Transform Digitally

PAYLAB
YOUR PAYMENT POWER TOOL.

Vault integrates PayLab for streamlined payment certification and management.
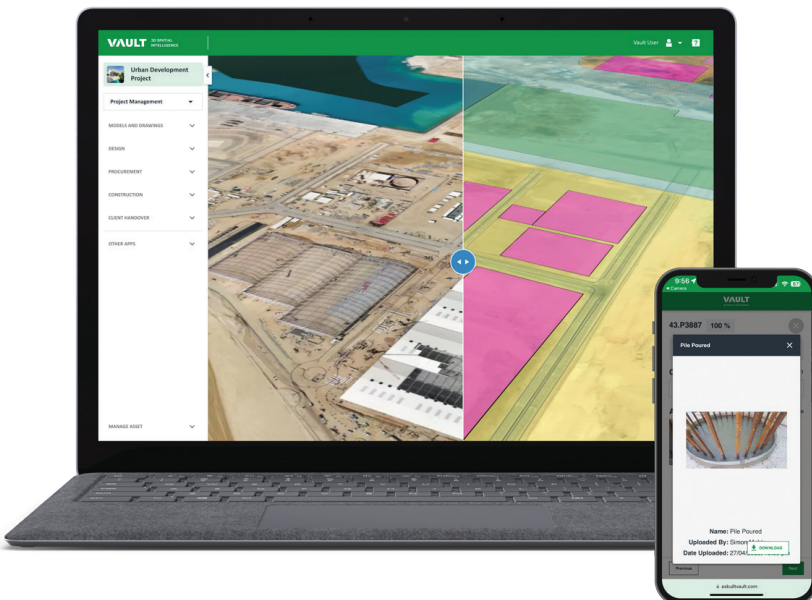

Solve costly construction problems with Vault's integrated ecosystem.

Vault is a flexible spatial data management solution, enabling construction teams to digitally unite their supply chain to report project progress; simply and efficiently.

THE VALUE OF VAULT

- Drives alignment of all stakeholders
- Reduces waste, inaccuracy and lost time
- Automatically generates early indicators (to manage risk)
- Enables in-built compliance with construction payment legislation
- Provides an intelligent foundation for digital advancement including AI.

Vault + Paylab = 50% faster payment processing

## Subcontractor Management

PAYMENT APPLICATION

The payment process can be executed by the supply chain using the Subcontractor dedicated application 'PayLab'.

Commercial Management

PAYMENT CERTIFICATION

PayLab functionality within Vault then surfaces invaluable commercial financial insights.

STREAMLINE PAYMENT ADMIN

- Forget the spreadsheets and messy emails. Provide subcontractors with a standardised means to record and deliver payment notices
- Mandate site teams to digitally save crucial information (insurance documentation, Producer Statements, Guarantees and more) and
- Streamline inconsistent payment application formats and/or double entry of data.

Subcontractor benefits

- Faster, easier payment application
- Compliance with legislation
- Enhanced financial visibility
- Easy-to-use PayLab app

SIMPLIFY EVERYTHING

- Reduce time verifying payment applications
- Allow your QS to concentrate on the important aspects of the job rather than the paperwork
- Load retentions and variations immediately against your base contract
- Generate a standardised procurement breakdown taken from design models, enabling real-time tracking and monitoring of work and costs of all your supply chain contractors.

Commercial benefits

- Enhanced financial visibility
- Variation management
- Retention management
- Financial dashboards
- Cost outturn prediction
- Compliance with legislation
